

Patient Review

Sex Reassignment Surgery

“The operation went really well, and I was looked after every single step of the way”

I had my Gender Reassignment Surgery at the IM Clinic and I cannot begin to explain how happy and amazed I am with the result. Whenever you read reviews you probably always ask why did someone go to that country for example? in this case Spain. Well the simple answer is; they have some of the best health care and surgeons in the world Doctor Ivan Mañero is one of them. From the moment I made my enquiry, I was offered a free consultation with a Doctor and coordinator (Aida) who speaks perfect English and is helpful and so friendly and easy to talk to.

At that time, I had spoken to numerous clinics including ones in the USA and UK but just looking at the IM Clinics results and attention to detail there was no comparison. Once booked Aida handled everything easily and efficiently and when the day arrived for my operation I was blown away by how friendly and lovely all the nurses and Doctors were they spent time explaining everything to me and Doctor Mañero himself came to see me to make sure everything was okay. Also, Dr Trinidad Labanca another one of the Doctors performing my operation came and spent time with me she's lovely and of course Aida was there with me the whole time holding my hand. I wasn't nervous at all.

The operation went really well and I was looked after every single step of the way. Every nurse here cannot do enough for you and I wish I could name everyone of them because there so special. The IM Clinic is the benchmark other Clinics should follow and my recovery was closely monitored and the nurses are assisting you all the time and nothing is to much trouble for them. The Doctors check everything is okay daily, so don't waste time looking at other clinics this is the very best and my results are amazing I'm so pleased and would recommend them to anyone without hesitation.
